**YOU MAKE IT
BIG AGAIN**

**Bilbao
13-17 June
2022**

BIEMH will come back stronger on 13-17 June 2022

After the lockdown that paralysed the whole world, the 31st BIEMH, International Machine-Tool Exhibition, is back, and it's set to be the most ambitious edition ever in terms of technology, solutions, proposals for innovation and exhibition space.

Huge motivation and energy is going into organising the event, where exhibitors and visitors from all over the world will be able to make business contacts, create synergies and develop new business opportunities.

Our thanks go out to all those firms, institutions and professionals who have put their trust in BIEMH.

**It couldn't have happened without you:
you make it big again!**

KNOWLEDGE, TECHNOLOGY, SOLUTIONS

Placing technology at the service of industrial productivity is fundamental in providing efficient solutions to complex manufacturing problems and moving forward in an ever more competitive market. That is why 3D equipment, machinery, products, and tools now feature heavily in precision mechanics, advanced engineering and digitisation.

With that in mind, we present the 31st BIEMH, where exhibitors will be presenting ground-breaking technologies and visitors can see how the latest advances can be applied to their equipment and services.

A NEW BOOST FOR BUSINESS

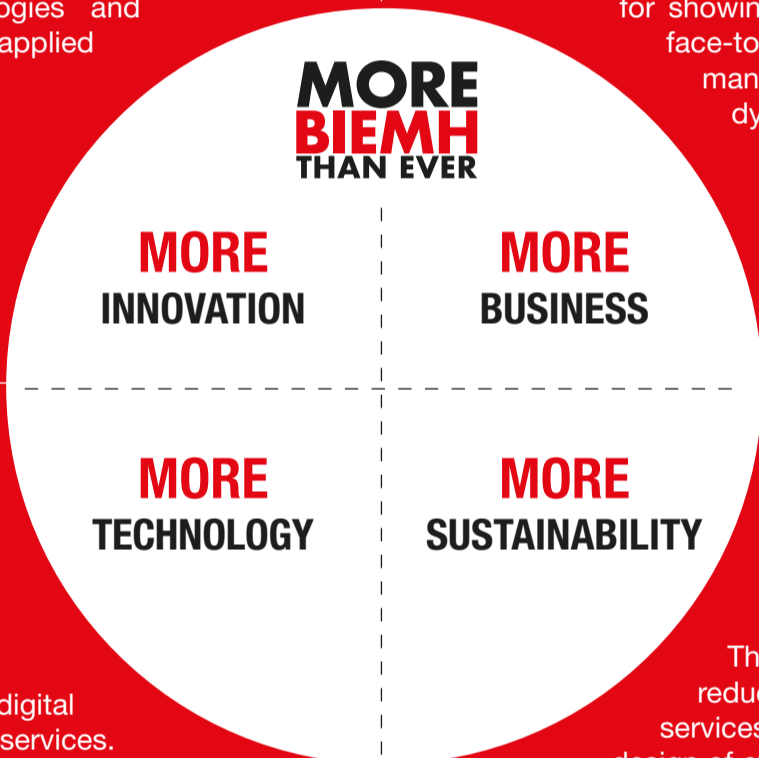

BIEMH is a benchmark event for many specialists and firms. It is a key element in re-establishing direct contacts and giving a new boost to innovation, valuable personal partnerships and sales operations. Each new edition brings to bear a whole system designed to create new opportunities, see contacts face to face and do deals.

The 2022 event will be a meeting point for sharing knowledge, for showing off the latest technology in operation, and for face-to-face contacts. A place to meet and interact with many more strategic specialists and experience the full dynamic energy of the sector.

ADVANCED MANUFACTURING, THE BACKBONE OF DIGITAL INDUSTRY

The industry of the future will focus on innovating through digitisation, permitting smart data handling in a world of high-value services.

BIEMH 2022 offers a forum for exhibiting digital technologies and truly innovative processes and services. Solutions for manufacturers of machine-tools and advanced technologies to help adapt and move forward in the digital transformation that is revolutionising the world.

SUSTAINABLE INDUSTRY

Environmental friendliness and the efficient use of natural resources are identifying traits of advanced industry.

The 31st BIEMH will focus on firms that work to reduce the environmental impact of their goods and services at all stages of their life cycles, that promote the design of efficient equipment and processes, that respect the environment and that guarantee a safe working environment.

SECTORS TAKING PART

EXHIBITORS

- Cutting machinery
- Forming machinery
- Other machinery & equipment
- Tools for machine-tools
- Components & accessories for machine-tools
- Automation of processes & manufacturing
- Metrology & quality control
- Corporate & production services

VISITORS

Managers, owners, directors & heads of department of manufacturers from:

- The automotive & automotive-ancillary industries
- Aeronautics & ancillary industries
- Railways & ancillary industries
- Energy
- Gas & Oil
- Metal construction
- Capital Goods
- Metalworking
- Steel
- Valves
- Engineering
- Metal & mechanical subcontracting
- Moulds, models & dies
